

PMI LAPSYSTEM™

Reusable 5mm Monopolar Instrumentation

MINIMIZE the Impact of Surgery

PMI LAPHANDLE™

An integrated handle and shaft built to withstand **up to 500** sterilization cycles

PMI LAPTIPS™

Single Patient Use

PMI LAPSYSTEM is a 5mm laparoscopic scissor system, providing a reusable handle and shaft along with a selection of single-patient, monopolar-capable scissor tips. The **PMI LAPSYSTEM** is ideal for minimally invasive surgical procedures where a safe, sharp, precise instrument is required.

- Enhanced cutting and distal tip range of motion improves control and accuracy for precise micro-dissection
- Ergonomically designed to increase control and reduce fatigue
- Novel shaft-to-tip design providing a safe and secure junction

A **FRESH** blade each case,
enabling **PRECISION** cutting.

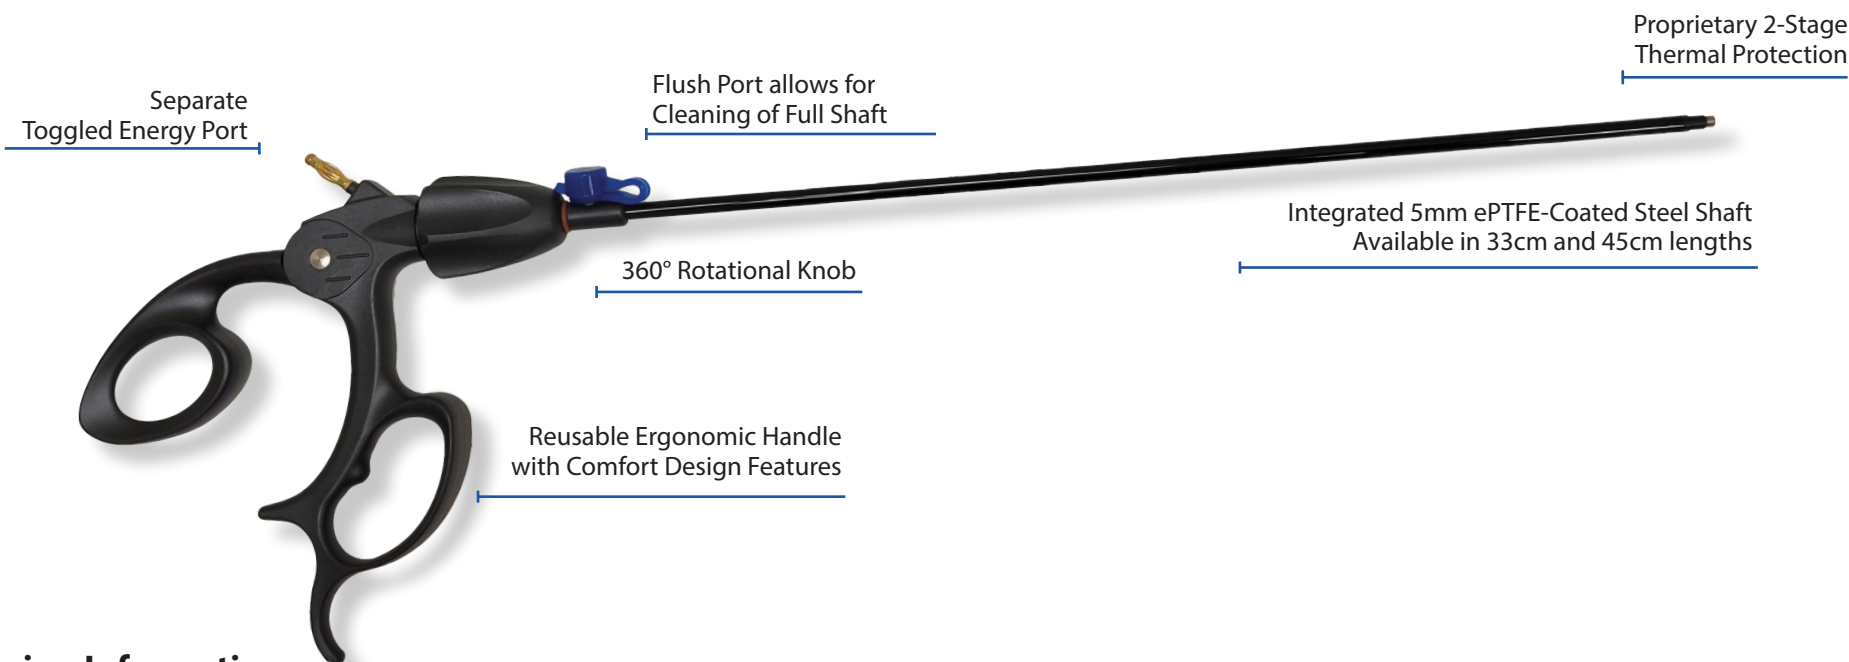

PMI LAPHANDLE™ - Reusable with Integrated Handle & Shaft

Features:

- Improved ergonomics with built-in control features
- PMI's proprietary 2-stage thermal protection overlap at the shaft-to-tip junction meets and exceeds electrical standards
- Novel ePTFE-coated shaft and tip connection
- Reposable glass-filled polymer handle providing a high performance thermoplastic composition

Benefits:

- Allows for comfort, control and reduced fatigue to benefit a wide range of hand sizes and orientations
- Enables an easy, secure connection with no ring inserts to replace
- Provides increased security at the connection and superior instrument longevity
- Exceptional durability designed to withstand 500 sterilization cycles

Ordering Information:

| Item Number | Item Description | Length | Qty. |
|-------------|--|--------|--------|
| PMILSH33 | PMI LAPHANDLE™, REUSABLE LAPAROSCOPIC HANDLE W/SHAFT 33CM, MONOPOLAR | 33cm | 1/each |
| PMILSH45 | PMI LAPHANDLE™, REUSABLE LAPAROSCOPIC HANDLE W/SHAFT 45CM, MONOPOLAR | 45cm | 1/each |

PMI LAPTIPS™ - Disposable, Single-Patient Use

Features:

- Novel 5mm disposable tip connection design
- Enhanced **PMI LAPTIP™** scissor aperture
- Two-step encapsulation adds protection at the shaft-to-tip junction
- Heavy-duty yellow protective tip sleeve

Benefits:

- Provides a simple secure connection to the **PMI LAPHANDLE™**
- Allows for a wide range-of-motion, enabling dissection of thicker tissue with less effort
- Ensures a secure, safe connection
- Provides safety and improves consistency and accuracy of tip application
