SMARTeZ® Elastomeric Infusion Pump

The safe, accurate and simple solution for short and long duration infusion therapy. SMARTeZ® disposable elastomeric pumps are intended for intermittent and continuous antibiotic infusion, chemotherapy, pain management and general infusion therapies.

SMARTeZ® Features:

- Transparent design to allow visual product inspection during pharmacist verification
- Individually calibrated for accuracy
- Expanded drug stability data available includes:
  - Longer dating for several medications when compared to competitor data
  - Commonly dispensed drug concentrations not previously studied in elastomeric pumps

  (See SMARTeZ Stability Data for Drugs Using Elastomeric Infusion Pumps)
- Extensive collection of flow rates and fill volumes available
- Double cap to protect sterility during filling
- Automated manufacturing provides a consistent and reliable supply, diversified therapy options and customizable volume and rate combinations
- Select sizes available in 6-packs for convenience, waste-reduction and enhanced productivity

The double cap design includes a disposable protective port cap. The winged design allows for easy removal and stands upright to protect the sterility of the color-coded fill port cap while filling the device. After filling the device reattach the color-coded port cap and discard the disposable winged cap.

SMARTeZ® Enhanced Design

- Color-coded by flow rate to assist in filling accuracy and reduce the risk of medication error
- Air and 1.2 micron particle-eliminating filter plus air eliminating membrane
- Design enables patients to participate in normal daily activities and improve quality of life:
  - Lightweight
  - Portable
  - Durable
  - No batteries required
  - No programming required
- Chemotherapy pump options designed for 5-FU infusions (items #s ending in C):
  - Designed with an amber-tinted outer covering
  - Flow restrictor element designed to reduce the risk of occlusion from precipitation
- Easy to use and simple to fill design for smoother and faster filling
- Disposable and single use
- Components are not manufactured with natural rubber latex and are DEHP Free

Accessory: Elastomeric Carry Pouch
