

PMI Straight Huber Needles

Our PMI Straight Huber needles are intended for administration or removal of fluids from implantable ports. We offer a variety of gauges and lengths to ensure a length suitable for the port and thickness of the patient's subcutaneous tissue.

Product Features:

- ◆ Sterile, single use needle
- ◆ Non-Coring, beveled cut tip point allows for greater septum life
- ◆ Color-coded, easy-grip hub to enhance safety
- ◆ Power rated at 300psi for contrast-enhanced CT imaging procedures
