

PMI HUBERNEEDLES

Non-Coring Straight Huber Needles

Designed for Ease-of-Use and Patient Safety

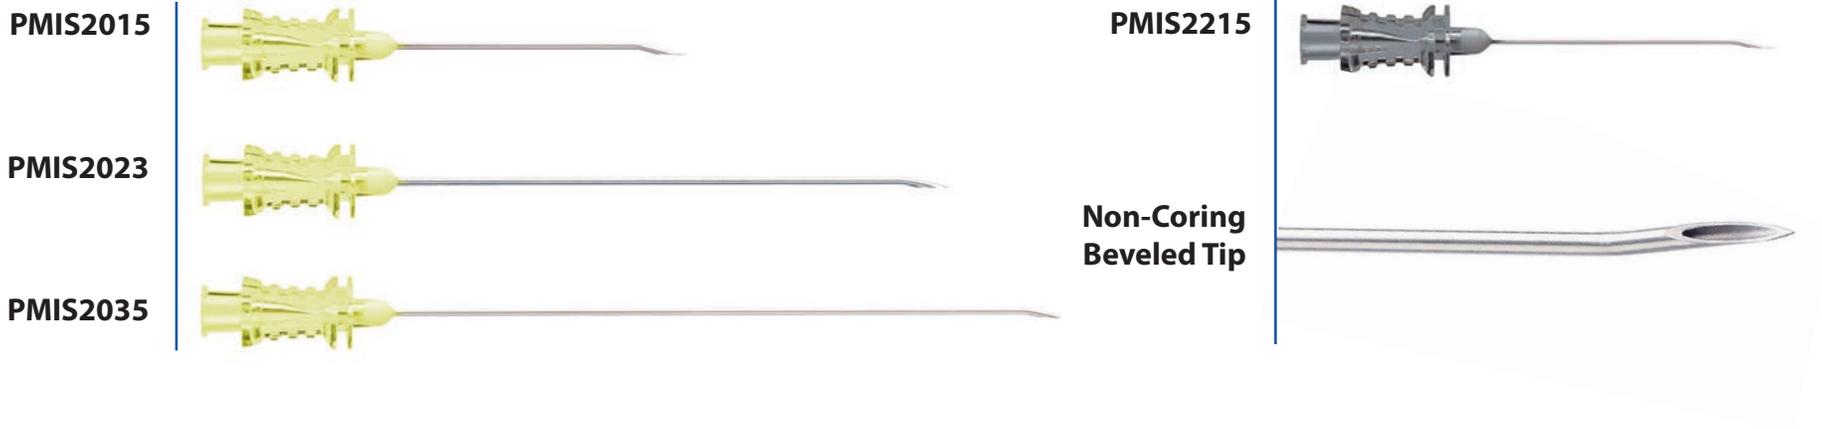

PMI HUBERNEEDLES are intended for administration or removal of fluids from implanted ports. We offer a variety of gauges and lengths to ensure the correct fit suitable for the port and thickness of the patient's subcutaneous tissue.

PMI HUBERNEEDLES Features and Benefits:

- Non-coring, bevel-cut needle design provides safety for the patient while enhancing the port longevity
- Color-coded, easy-grip hub to enhance safety
- Power rated at 300 psi for contrast-enhanced CT imaging procedures
- Sterile, single-use needle
