

Are you using a NASHVILLE SURGICAL KC-002 Kumar Clamp? Save 30% plus on GPO contracted Catheters from Progressive Medical today!

More than 600,000 cholecystectomies per year are performed in the United States.¹

PMI's **Operative Cholangiogram Catheters** offer an average **25-30% cost savings** when compared to the competition. Our **Cholangiogram Grasper** is **reusable**, made of medical grade **stainless steel** and is available in both **standard and bariatric length**.

One of the most feared complications of cholecystectomy is bile duct injury (BDI).²

The PMI **Cholangiogram Grasper** is designed to advance our **Operative Catheter** so the needle **precisely punctures** the Hartmann's pouch of the gallbladder for easy biliary access and **eliminates the need for cystic ductotomy**.

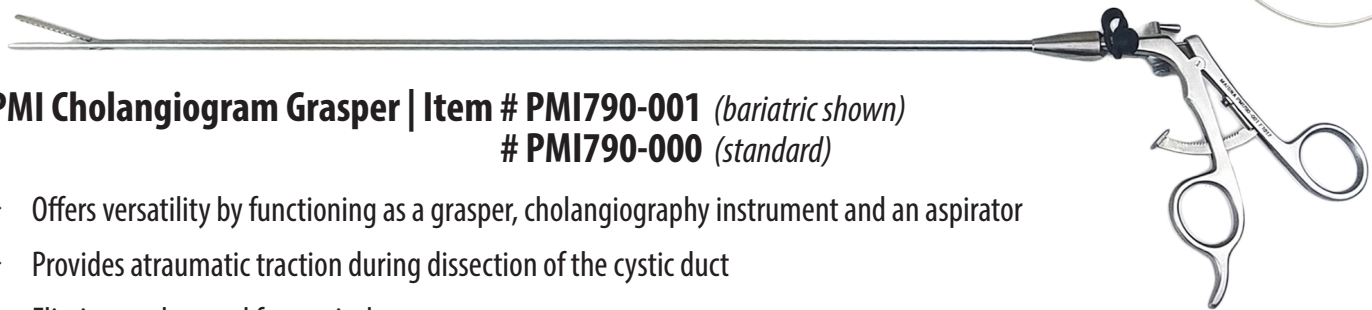

PMI Operative Cholangiogram Catheter | Item # PMIORCA (10 per box)

- ◆ For use with the PMI Cholangiogram Grasper
- ◆ Features 19 gauge, 1.25cm needle that allows for biliary access to Hartmann's pouch and dye injection
- ◆ 76cm of tubing

PMI Cholangiogram Grasper | Item # PMI790-001 (bariatric shown) # PMI790-000 (standard)

- ◆ Offers versatility by functioning as a grasper, cholangiography instrument and an aspirator
- ◆ Provides atraumatic traction during dissection of the cystic duct
- ◆ Eliminates the need for cystic ductotomy
- ◆ Vent with channel valve allows for maintenance of pneumoperitoneum, aspiration and can function as a smoke vent
