

PMI Suture Guides

The PMI Suture Guides are designed for consistent and secure suture passing. The angled guide holes are precisely positioned to enable full thickness closure of the fascia.

Product Features:

- ◆ Available in multiple sizes for all laparoscopic procedures including bariatrics
- ◆ Guides are reusable, non-sterile and individually packaged
- ◆ Tapered design allows for easy insertion
- ◆ Angled guide holes, precisely positioned enable capture of all tissue layers and full thickness fascia closure
- ◆ Composed of Surgical Grade Stainless Steel

Available in 2 and 4 hole configurations

PMISG10

PMISG12B2

PMISG12B4
