

# PMI Huber Safety Infusion Sets

The PMI Huber Safety Infusion Set is a safety IV administration set used to access vascular ports. Once deployed the needle is completely enclosed to reduce the incidence of needle stick injury during removal, transport and disposal.

- ◆ Patent pending telescopic needle encapsulating cone reduces the risk of needle stick injury while providing a barrier to protect against blood, fluid and drug exposure
- ◆ All sets are power rated and available in a variety of needle gauges and lengths
- ◆ Available in both needle-free Y-Site and without Y-Site
- ◆ Lipid compatible
- ◆ Ergonomic pinch clamp designed for one-handed operation
- ◆ Textured wings and flexible pull tab enable easy and safe insertion and removal
- ◆ Low profile design and soft wings ideal for patient comfort
- ◆ OSHA compliant with safety features integral to the design
- ◆ Not manufactured with natural rubber latex
- ◆ No DEHP containing plastics were used in the device manufacture
