

INTRODUCING

EXOFLEX™

The manifold that morphs with your clinician's demands

ExoFlex™ with Q2® Technology is a new manifold designed to span departments and accommodate the need of being **rigid or flexible - in seconds.**

- Assists in waste reduction initiatives
- Reduce risk of HA-BSI with the Q2 swabable, split septum valve¹
- Reduce soft costs as the product is assembled, sterilized and ready for use
- Reduce SKUs
- ExoFlex decreases line manipulation reducing associated errors and infection risks

ExoFlex. Spanning departments without breaking the line.
