PMI ELECTRODETIPS

The complete line of electrosurgical tips including Tungsten Micro Needles, Laparoscopic Length, PTFE Coated, LLETZ Loops, Split Tips, and accessories.

Designed to maximize precision and minimize tissue trauma, **PMI ELECTRODE**TIPS offers a variety of options to meet your electrosurgical needs. Our disposable coated electrodes are designed to resist eschar build-up, and produce less smoke with a new shaft insulation for every case.

PMI ELECTRODETIPS are disposable, single-use electrodes that are coated to stand up to high temperatures and minimize the probability of damage to surrounding tissue. The PTFE coating resists eschar build-up and reduces smoke during surgical procedures.

Product Features:

- Variety of tips and configurations to fit a variety of electrosurgical needs
- PTFE coated standard electrodes in many styles
- Tungsten Microneedles for precision surgery
- Single-use LLETZ Loop and Square electrodes

Product Benefits:

- Fit a variety of your electrosurgical needs at a great value
- Coated electrodes resist build-up, lessen surgical smoke and are consistent performers.
- Tungsten Microneedles allow precision and control, while minimizing tissue damage in delicate procedures.
- New, fresh loop and square LLETZ electrodes for patient safety and fine dissection.
